## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Brian Klock (Registration No. 36,570) on April 28, 2008. The application has been amended as follows:

#### In the claims:

Claim 3, line 13, replace "predetermined index" with --determined symbol index--

Claim 3, line 15, replace "symbol" with --message symbol--

Claim 4, line 2, replace "symbol" with --message symbol--

Claim 7, line 5, replace "symbols" with --symbol indexes--

Claim 7, line 6, replace "symbol" with --symbol index--

Claim 9, line 2, delete "of the symbol"

Claim 10, lines 8, 10, 11, replace "symbol" with --symbol index--

Claim 14, line 13, replace "predetermined index" with --determined symbol index--

Claim 14, line 14, replace "symbol" with --message symbol--

Claim 15, line 2, replace "symbol" with --message symbol--

Claim 18, line 6, replace "symbols" with --symbol indexes--

Claim 18, line 7, replace "symbol" with --symbol index--

Claim 20, line 2, delete "of the symbol"

Claim 21, lines 8, 10, 11, replace "symbol" with --symbol index--

### *Reasons for Allowance*

2. The following is an examiner's statement of reasons for allowance:

Referring to claims 3 and 14, the essential difference from the prior art is determining the watermarked value of the coefficient by at least selecting a modified value of the coefficient, determining a symbol index according to the modified value and a first predetermined function, determining the value of the message symbol corresponding to the determined symbol index, and verifying that the determined value of the message symbol corresponds to the transformation of the modified value by a second predetermined function. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Referring to claims 7 and 18, the essential difference from the prior art is extracting the message from an image by calculating a symbol index and a binary value according to a value of each coefficient of the image, totaling the number of each of the binary values obtained for each of the symbol indexes, and allocating to each symbol index the binary value having the largest total. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Referring to claims 10 and 21, the essential difference from the prior art is extracting a message from an image by calculating a symbol index according to a value of each coefficient of the image, calculating a first and a second value, both according to a value of the coefficient, a first totaling of the absolute values of the differences between the value of the coefficient and the first value for each symbol index, and a second totaling of the absolute values of the differences between the value of the coefficient and the second value for each symbol index, and allocating to each symbol index a binary value according to the smallest total amongst the first and second totals. These features in combination with the other elements of the claim and the base claim are not disclosed or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
